Lt and Lakesha,

I received a call and email from Mr. Wisner regarding an encampment in his area. I plan on sending the team (Citywide) there tomorrow, but was hoping a LAHSA team might be able to put this on their schedule for today. We already sent out the locations for today, but once we are done we will try to send our team to this locations. We also have OHS today and would like to give the people at this encampment another opportunity to get into compliance before tomorrow.

Just in case, we have contacted/outreach the homeless subjects at this location in the past (within the last 2 months) and they refused services (Grace).

Respectfully,

Sergeant Arturo Siguena

Dear Officer Siguena,

It was good to speak to you today. I have as you suggested submitted another request to 311. Here is the text that was submitted. We all hope that you can assist us in resolving this serious problem.

Thank you,

Here is the message:

This is a dangerous person that is causing the female workers in the surrounding business' to be very concerned. The encampment contains a man and his dog, who is loose and also creates problems for the customers and the employees of the neighbors. He has been asked to leave multiple times by business owners and refuses to do so. Instead, he is alleged to deal with drug trafficking with a van that sits down the street on Mines toward Olympic. While we have no proof of this, the female workers and customers no longer want to park on Mines Ave. This is a serious problem and impacts revenue for the L. A. business owners on the street. My employees choose to have us remain anonymous out of their fear. Please help solve this problem quickly.
